

Nokia 2720 Flip

The classic flip is back with 4G

Colours
Black | Grey

Key features

The classic flip phone is back, and remains as simple and easy to use as ever – only now it has a few added extras, including the Google Assistant, WhatsApp, Facebook and 4G.

Simple and reliable

It's the flip phone you remember, with some new upgrades. With simple to use features, such as big buttons and text, it's familiar and reliable to help you stay connected to friends and family.

Classic flip

Nokia 2720 Flip has two separate screens. The external screen lets you see notifications or check who is calling, before flipping it open and revealing the big main screen. When you're finished with your call, simply flip it closed to hang up.

The Google Assistant – Get more done with your voice¹

Make calls and send messaging without typing. With a push of a button, your Google Assistant can help manage your phone features with just your voice.

Peace of mind

If the unexpected happens, Nokia 2720 Flip emergency button could bring peace of mind. Pressing the button sends an emergency text message, including the current location, and calls five emergency contacts in the address book.

WhatsApp, Facebook and more on 4G

Essential apps, such as Facebook and WhatsApp, come preloaded to help you stay in touch with friends and family. Plus it comes with both 4G and internet sharing capabilities.

Nokia 2720 Flip sales package includes

- Nokia 2720 Flip
- Charger, charging / data cable
- Quick guide
- Headset (Differs by market)

1. The Google Assistant is available in selected languages only. | 2. The actual availability of VoLTE HD calls is subject to local operators' and carriers' services. | 3. Pre-installed system software and apps use a significant part of memory space. | 4. Button option is selected during start up. If Accessibility mode is selected during first boot up of the Nokia 2720 Flip, then the Emergency button is activated. If Accessibility mode is not selected, then the button will be setup for The Google Assistant. | 5. Battery has limited recharge cycles and battery capacity reduces over time. Eventually the battery may need to be replaced. | 6. Testing done in lab conditions with no background apps running. Test may differ between single sim and dual sim variants.
